

Pedro A. Sanches
Frontend Engineer in Curitiba, Brazil, He/him
pedrosanches.dev

About

I'm a design-minded software engineer based in Curitiba, Brazil. Interested in building software that is intuitive, inclusive, and delightful to use.

Currently, I'm building UI at [Maple](#). Before, I was improving SRM software for Michelin's on-call service in North America.

I primarily work with frontend and mobile development using React and React Native with Typescript.

Side Projects

2023 TinyWins
A tiny personal happiness tracker. Made with React Native and available on the App Store. tinywinsapp.com

Work Experience

2023 — Now Senior Frontend Engineer at Maple
Remote

Maple is a next-generation platform for long-term healthcare facilities. We set out to build the most complete platform for the segment, being the first to fully centralize workforce data across internal staff, float pools, and external agencies.

My role is to help build the frontend of the platform, focusing on the user experience and both planning and executing new features from start to finish.

2019 — 2023 Senior Software Engineer at Decisiv / Michelin
Remote

Decisiv provides Service Relationship Management (SRM) software for the commercial vehicle industry. I helped scale and improve the frontend of Michelin's OnCall service in North America.

2016 — 2019 Lead Frontend Engineer at StayCircles
Remote

At StayCircles, I've led frontend and mobile engineering for two products: a cutting-edge Airbnb-like social web and mobile platform, and a mobile app for finding affordable flight tickets.

I've designed, coded, and delivered multiple iterations of the applications in a fast-paced environment, using React Native for sharing code across platforms, resulting in faster time-to-market.

2015 — 2016

Software Engineer at Spacemapp
Curitiba, Brazil

I co-founded Spacemapp with a mission to empower individuals to discover events in their city and foster meaningful community connections while driving visibility for local businesses.

We achieved recognition by SEBRAE, Brazil's esteemed national support service for micro and small enterprises, through selection into their startup program Epifania 2016 in Curitiba.

2012 — 2014

Web Developer at Dois Padrinhos
Curitiba, Brazil

At Dois Padrinhos, I've utilized existing platforms to rapidly design, develop, and launch a highly functional and responsive e-commerce and blog website.

I've integrated critical e-commerce components for the Brazilian market, including payments, shipping fees, order tracking, invoicing, and authentication, optimizing user convenience and driving revenue growth.
